***AIML Engineer | GenAI | Agentic AI | Data Analyst | SQL***

**AI/ML Engineer / Data Analyst** in the making, with a strong foundation in Machine Learning, Deep Learning, and Generative AI. Hands-on internship experience in building real-world AI solutions and end-to-end ML pipelines. Skilled in Python, SQL, and scalable AI applications. IIT GenAI Hackathon semi-finalist with strong problem-solving skills and experience in developing AI-powered projects and data-driven solutions.

## EDUCATION

**DY Patil University, Pune** 2022-2026
BTech in Artificial intelligence and Data Science (CGPA: 9.52/10)

## EXPERIENCE

- **SmartKargo | *(AI Intern)*** July 2026
  - Developed an Operational AI Chatbot to provide business insights without manually navigating Power BI dashboards.
  - Enabled conversational data queries with Graph-based visualizations for better understanding of operational trends.
  - Integrated Weather API to monitor airport weather conditions and generate alerts for potential operational disruptions.
  - Built a Shipment Tracking Automation system using FastAPI and Power BI Semantic Models.
  - Identified shipment destinations by matching tracking numbers with destination codes.
  - Automated redirection to the respective carrier's official tracking website based on destination codes.
  - Integrated FastAPI with Power BI to streamline shipment lookup and carrier identification.
- **HEProAI | *(AIML Intern)*** Jan 2026-Mar 2026
  - Developed an AI-based mentoring system for personalized guidance using Machine Learning and NLP.
  - Built data-driven pipelines for real-time support using Python, Scikit-learn, and basic LLM concepts.
  - Enhanced user engagement by delivering context-aware recommendations and adaptive learning support.
- **Algonive | *(Data Science Intern)*** Oct 2025-Dec 2025
  - Built a chat analysis system to extract insights like user activity, sentiment, and word frequency using Python, Pandas, and NLP.
  - Implemented data visualization and pattern detection using Matplotlib, Seaborn, and text preprocessing techniques.
  - Generated actionable insights to understand communication patterns and user behavior trends.
- **Cognifyz Technologies | *(AIML Intern)*** Aug 2025-Sept 2025
  - Developed a classification model to predict BP levels using Machine Learning algorithms with Scikit-learn.
  - Performed data preprocessing, feature engineering, and model evaluation, achieving ~90% accuracy using Python.

## SKILLS

**Programming** : Python, SQL, HTML, CSS, File Handling,Streamlit
**Machine Learning/Deep Learning** : Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation
**Cloud Platform** : AWS (S3, VPC), Docker, CI/CD, AWS Azure
**GenAI/LLM** : LangChain, Langraph , Vector Databases, OpenAI APIs, Document Intelligence Pipelines,HuggingFace
**Data Analysis**: EDA, ELT Pipelines, Data Visualization, Power BI, Tableau
**Audio & Signal Processing**: Speech Emotion Recognition, MFCC Feature Extraction
**Tools**: Pandas, Flask, REST APIs, Git, GitHub,Tesseract OCR,Microsoft Copliot Studio ,Microsoft Fabric,Microsoft Foundry

## PROJECTS

### AI Multilingual Document Invoice Extractor | GitHub | IIT Hackathon Semi final PROJECT

- Built a multilingual invoice extractor using ***Pytesseract OCR*** and Roboflow augmentation for diverse languages, signatures, and stamps.
- Implemented ***YOLOv8*** with *EDA* preprocessing for accurate invoice field detection.
- Integrated ***GenAI*** with ***Streamlit*** UI for contextual extraction and real-time visualization.
- Enhanced extraction precision through optimized preprocessing of noisy, unstructured multi-format invoice data

### AI Smart Itinerary Planner | GitHub

- Developed an AI-powered travel planner using RAG, generating day-by-day itineraries, city insights, and hotel recommendations from user input.
- Built using Mistral ***LLM (ctransformers), FAISS, and Flask, with Google Maps links*** and hotel price filters for accurate travel content.
- Deployed on **AWS S3**, ensuring scalability and clear separation of frontend, retrieval system, and AI logic.
- Improved recommendation relevance using context-aware retrieval and prompt optimization.
